

## Postdoctoral position in aging research and age-associated diseases

An up-to five years postdoctoral position will be available immediately at Department of Endocrinology, Metabolism and Cardiovascular System, Section of Medicine, University of Fribourg, Switzerland. The successful candidate will be investigating mechanisms of organism aging, age-associated degenerative diseases including but not limited to cardiovascular, metabolic disease, chronic inflammation, and cancer. Interested candidates with a PhD and/or MD in biomedical research and solid experience in cellular/molecular biology, biochemistry, and *in vivo* animal models are especially encouraged to apply. Experience in organoid culture or organ regeneration are highly appreciated. For further details regarding our on-going research projects please visit [http://www.unifr.ch/inph/groupeyang/en/yang\\_en.php](http://www.unifr.ch/inph/groupeyang/en/yang_en.php).

Please send your application (by post or email) till June 30, 2018, including a motivation letter, CV, copy of degree/diploma certificates, a brief statement on previous research experience, and contact details for at least two referees to:
